PROFESSIONAL SUMMARY

Java Developer with 4+ years of experience designing and delivering scalable, enterprise-grade backend systems and full-stack web applications. Proficient in **Java 8, Spring Boot, Spring Cloud, Microservices Architecture, REST APIs, Hibernate/JPA, and MySQL**. Demonstrated expertise in **Healthcare IT** domain through end-to-end development of hospital management modules (OPD, IPD, Billing, Payroll). Sole architect and developer of **MKCare** — a production-ready, multi-tenant SaaS HMIS platform built on a **10-microservice Spring Cloud architecture**. Strong command of **Agile/Scrum** methodologies, **CI/CD pipelines**, object-oriented design, and **Spring Security (JWT/RBAC)**. Seeking a Senior Java Developer role to deliver high-impact backend solutions at scale.

CORE COMPETENCIES

Languages & Platforms: Java 8, JavaScript (ES6+), SQL, PL/SQL, HTML5, CSS3, JSON

Frameworks & Libraries: Spring Boot, Spring Cloud, Spring MVC, Spring Security, Hibernate, JPA, Java EE (JSF, EJB, JPA), PrimeFaces, AngularJS, Bootstrap, jQuery, AJAX, OpenFeign, Lombok

Microservices & Architecture: Microservices Architecture, REST API Design, API Gateway, Netflix Eureka (Service Discovery), Multi-Tenant Architecture, HikariCP, Spring Cloud Hoxton, OOP, Design Patterns

Security: Spring Security, JWT / JJWT, BCrypt, Role-Based Access Control (RBAC), Stateless Authentication

Databases: MySQL, PL/SQL, JDBC, JPA / Hibernate ORM, JPA EntityManager, Database Schema Design, Query Optimization

DevOps & Build Tools: Maven (Multi-Module), Git, GitHub, GitLab, GitLab CI/CD, SVN, Apache Tomcat, CI/CD Pipelines, Version Control

Testing & Debugging: Unit Testing, Integration Testing, Performance Optimization, Postman, Swagger / OpenAPI, Chrome DevTools

Methodologies: Agile, Scrum, Sprint Planning, Code Review, Object-Oriented Programming (OOP), Exception Handling, Multithreading

Domain: Healthcare IT, HMIS, OPD / IPD Workflow, Billing & Invoicing, Clinical Records, Patient Management, Multi-Tenant SaaS

PROFESSIONAL EXPERIENCE

Software Engineer | Micropro Software Solution Ltd., Nagpur Jun 2024 – Present

Domain: Healthcare IT | Project: HOSPYCARE — Hospital Management System (OPD, IPD, Insurance, Finance, Payroll, Duty Roster)

- Improved hospital workflow processing efficiency by **40%** by architecting and delivering **Master, Transaction, and Reporting modules** for the HOSPYCARE platform using **Java EE (JSF, EJB, JPA)**, PrimeFaces, and **Spring Boot REST APIs**, reducing manual operational overhead across OPD, IPD, Finance, and Payroll departments.
- Reduced **API response latency by 35%** by optimizing **JPA EntityManager** query execution (persist, merge, remove, JPQL) and refactoring **Spring Boot** service layers, improving data throughput across modules handling 500+ concurrent hospital users.
- Increased application stability by **25%** by implementing **Stateless Session Beans** and Remote EJB Interfaces to handle business logic, eliminating session-related production failures and supporting real-time system enhancements and defect resolution.
- Accelerated feature deployment cycles by **30%** by contributing to **CI/CD pipelines** using **GitLab CI, SVN, and Apache Tomcat**, enabling automated builds and consistent delivery across development and staging environments.
- Reduced critical bug recurrence rate by **20%** by performing systematic root-cause analysis, debugging, and **performance optimization** of Java backend modules in collaboration with cross-functional QA and module lead teams in an **Agile/Scrum** environment.

Junior Java Developer | Atmaniirbhar Facility Management Pvt. Ltd.

Jan 2022 – Mar 2024

Domain: Enterprise Application Development & Real-Time Data Systems

- Delivered **15+ production-ready feature modules** on schedule by implementing end-to-end user stories using **Java, Spring Boot, JDBC, and SQL**, contributing to a **20% increase in sprint velocity** and consistent on-time releases across quarterly milestones.

- Reduced real-time data processing latency by **30%** by developing optimized **Spring Boot backend services** with SQL stored procedures and indexed **MySQL queries**, improving system responsiveness for live enterprise data pipelines handling high-frequency updates.
- Increased UI responsiveness and user engagement by **25%** by building **10+ dynamic AngularJS frontend modules** that consumed **RESTful APIs** via AJAX, with responsive layouts implemented using **Bootstrap and CSS3**, reducing reported UX issues by half.
- Decreased data retrieval time by **30%** by designing and normalizing a **relational database schema** for score and player statistics using **MySQL**, implementing composite indexes and **JPA/Hibernate ORM** mappings to eliminate N+1 query bottlenecks.
- Improved API security and reliability by implementing **JWT-based authentication**, **RESTful API** security best practices, and input validation across all backend endpoints, ensuring zero security incidents post-deployment.

KEY PROJECT

MKCare — Multi-Tenant Hospital Management System (HMIS) SaaS Platform Self-Built | Sole Developer

Tech Stack: Java 8 · Spring Boot 2.3 · Spring Cloud Hoxton · Netflix Eureka · API Gateway · OpenFeign · Spring Security · JWT/JJWT · MySQL · HikariCP · AngularJS · ngRoute · Maven Multi-Module

- Engineered a **production-ready multi-tenant SaaS HMIS** platform from scratch, achieving **complete data isolation per clinic** at runtime by implementing **dynamic MySQL database routing** per tenant using **Spring Boot, HikariCP, and Spring Cloud Hoxton** — reducing new clinic onboarding time by **60%** compared to a traditional single-database setup.
- Secured platform access across **6 distinct user roles** with zero unauthorized access incidents by designing **stateless JWT/JJWT-based authentication** and **Role-Based Access Control (RBAC)** with **Spring Security**, integrated with **API Gateway and Netflix Eureka** service registry for centralized routing and discovery across 10 microservices.
- Eliminated **70% of manual reporting effort** across 15+ report types (billing, OPD, patient vitals, appointments) by building an automated **Report Service** within a **10-microservice Maven Multi-Module architecture** using **Spring Boot, OpenFeign (inter-service communication)**, and an **AngularJS SPA (30+ controllers)** for real-time data visualization.

EDUCATION

M.Sc. SFS College, Nagpur — CGPA: 8.18 / 10	2021
B.Sc. Shri Mathuradas Mohota College, Nagpur — CGPA: 5.5 / 10	2018
Higher Secondary (HSC) Maharashtra State Board — 62%	2015

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** — Amazon Web Services (AWS), 2025
Validation ID: 6e8c0b5d3a07424588280726364e6952
- **Fundamentals of Cloud Computing** — Coursera
