

MASUM NAMDEO DUHIJOD

Java Developer | Spring Boot | Microservices | Full Stack
+91-7276901490 | masumduhijod1998@gmail.com | Nagpur, Maharashtra, India | 4.5+ Years Experience

PROFESSIONAL SUMMARY

4.5+ years of experience as a Java Developer building backend services and responsive UIs. Proficient in Spring Boot, AngularJS, and SQL, with hands-on experience in healthcare software projects. Strong background in full-stack development, RESTful services, microservices, and scalable architecture. Creator and sole developer of MKCare — a self-built, multi-tenant Hospital Management System (HMIS) SaaS platform.

TECHNICAL SKILLS

Languages: Java 8, JavaScript, SQL / PL/SQL, HTML5, CSS3
Backend: Spring Boot, Spring Cloud, Spring MVC, Hibernate, REST APIs
Microservices: Netflix Eureka, API Gateway, OpenFeign, HikariCP, Multi-Tenancy
Security: JWT / JJWT, BCrypt, Spring Security, RBAC
Frontend: AngularJS, ngRoute, jQuery, AJAX, Bootstrap
Database: MySQL, PL/SQL, JDBC, JPA/Hibernate
Tools & Practices: Maven, Git / GitHub, GitLab, SVN, NetBeans IDE, Apache Tomcat, Swagger, Postman, Lombok, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer

June 2024 – July 2026

Micropro Software Solution Ltd. | Healthcare IT | Project: HOSPYCARE

- Developed enterprise-level web modules using Java EE (JSF, EJB, JPA), PrimeFaces, and Spring Boot REST APIs.
- Designed and implemented Master, Transaction, and Reporting modules for hospital workflow management.
- Implemented business logic using Stateless Session Beans, Remote Interfaces, and Spring Boot services.
- Performed database operations using JPA Entity Manager and integrated with Spring Boot APIs.
- Handled real-time production issues, debugging, and system enhancements.
- Worked with Apache NetBeans, GitLab, SVN (Subversion), JDK, and Spring Boot framework.
- Assisted in debugging, testing, and performance optimization of application modules.

Junior Java Developer

Jan 2022 – March 2024

Aatmanibhar Facility Management Pvt. Ltd. | Enterprise Application Development & Real-Time Data Systems

- Coded and implemented features based on user stories and requirements.
- Developed backend logic using Spring Boot, JDBC, and SQL for real-time data updates.
- Built UI with AngularJS and collaborated with designers for responsive, user-friendly interfaces.
- Designed and optimized database schema for score and player statistics.
- Implemented RESTful APIs and followed security best practices.
- Technologies: Java, Spring Boot, JDBC, SQL, AngularJS, HTML, CSS, JSON, Tomcat, NetBeans.

PROJECTS

MKCare — Multi-Tenant Hospital Management System (HMIS SaaS)

Personal Project

Fully self-built, production-ready multi-tenant SaaS HMIS for hospitals and clinics. Each hospital gets a completely isolated MySQL database at runtime, covering the full hospital workflow — patient registration, billing, OPD, prescriptions, and reporting.

Tech Stack: Java 8, Spring Boot 2.3, Spring Cloud, Netflix Eureka, API Gateway, OpenFeign, Spring Security, JJWT, MySQL, HikariCP, AngularJS, ngRoute, Maven Multi-Module

- 10 microservices architecture with API Gateway + Eureka service registry.
- JWT authentication with role-based access control (RBAC) across 6 roles.
- Core modules: Patient, Doctor, OPD, Appointment + Slot Engine.
- Billing, invoicing, and payments processing.
- Report service generating 15+ operational and clinical reports.
- AngularJS SPA front end with 30+ controllers.
- Dynamic multi-tenant database routing — isolated MySQL database per hospital at runtime.
- CVR and vitals recording, plus a super-admin portal for multi-clinic management.

DOMAIN KNOWLEDGE

Healthcare IT, HMIS, OPD Workflow, Appointment Scheduling, Billing & Invoicing, Clinical Records, Patient Management, Doctor Scheduling, Multi-Tenant SaaS

EDUCATION

M.Sc. — SFS College, Nagpur

2021 | 8.18 CGPA
